

Junior IT consultant

This position is permanent and based in Brussels, on-site at the client.

We are looking for candidates with a bachelor in IT and deep interest for devOps, Linux / Db2 / scripting.

About the Organisation:

Our client is a Belgium based company specialized in Information Technology services. They are a team of internationally recognized Information Technology professionals with pan-European and multilingual presence.

They have privileged access to technology sources of information and support, and proudly hold a large portfolio of IT services success stories. They develop their operations in the education, data migration, DevOps, performance, and infrastructure areas.

The Position:

We are looking for a number of motivated IT Operations specialists to join our Operations Competency Center.

This is an opportunity to boost your career with first class IT Operations/DevOps hands-on experiences. For this role, you will receive on-the-job training, senior coaching, and a career path opportunity.

You will be part of an international multi-disciplinary team, and you will be involved in technically challenging and rewarding projects.

Responsibilities:

As an IT Operations specialist, your responsibilities include:

- Documentation of operational processes and procedures
- Monitoring and follow-up of enterprise applications flows
- Creation and maintenance of Control-M flows
- Review and implementation of changes as assigned by team management
- Understanding and advising on operational flows interdependencies
- Provision of support to incident management
- Participation in the operational scheduling upgrade and migration
- Taking a proactive role in advising improvements to ensure operational efficiency
- Being the first line in the escalation procedure
- Integrate the shift based 6:00 to 21:00 x 365 environment's SLA

Requirements:

- Familiar with Linux / Db2 / scripting
- Experience with batch scheduling tools is an asset
- Ability to communicate in English plus either French or Dutch
- An autonomous team player, taking ownership, and a result-oriented mindset is key
- Good communication and documentation skills
- Able to work under pressure and meet deadlines
