

Project Manager Physical Security

We are actively looking for **Project Managers** with experience in IT infrastructure. This is a permanent position. The offices are near Vilvoorde but you will be working from home and going as well on-site at clients (when authorised).

As Project Manager your responsibilities will be in leading all Security and access control projects of our client sites.

Key tasks of the job are: reporting, supervise project timings and budgets, being creative and proactive.

Tasks :

- analyse the project together with the client
- follow the parameters of the project such as cost, quality, risks, issues
- ensure the good follow-up of the project
- deliver regular reportings on the project status
- ensure a good communication with all the stakeholders
- respect the time and budget, ensure an appropriated documentation, transfer the project to the operations team and clients

Profile :

- you have a Bachelor or Master, preferably in IT or Economic background
- you have experience in Project Management in Technology
- you have experience with commercial aspects : financial, planification, allocation of resources
- you speak fluently Dutch + English and good French
- you have experience with project methodologies, preferably Prince 2
- you have good communication skills, can be acertive, and teamplayer

Offer :

- open ended contract
- company car with all the benefits of a PM
- huge projects, real possibility to work independently
- constant trainings and growing possibilities
